🌐 Linked-In 🏠 GitHub 📄 Portfolio

PROFESSIONAL SUMMARY

Motivated and detail-oriented final-year Software Engineering graduate specializing in Full Stack Development. Experienced in building responsive, secure, and scalable web applications using the MERN Stack and Next.js. Hands-on experience in developing Web3 applications with Ethereum and Solidity, combined with a strong interest in modern web technologies and user experience design. Dedicated to creating innovative, efficient, and user-focused digital solutions while continuously expanding technical expertise.

EDUCATION

NSBM Green University, in affiliation with Plymouth University, UK,
BSc (Honours) in Software Engineering | 2nd Upper Div.

Dharmapala Vidyalaya, Pannipitiya, G.C.E.Advanced Level

SKILLS

Languages & Frameworks: Java, JavaScript, Next.js, React, Node.js, Express, Flutter

Databases: MySQL, Firebase, MongoDB, Supabase

Tools: Git, GitHub, Figma, Postman, VS Code

Concepts & Practices: REST API development, JWT Authentication, Responsive Web Design

PROJECTS

1) Flavor Town – Restaurant Management & Ordering System, University of Plymouth | Dec 2025 – Jan 2026

Developed a full-stack restaurant management web application enabling customers to browse menus, place orders, and make table reservations. The system includes an advanced Admin Dashboard for managing categories, menu items, orders, and customer reviews.

Role: Security & Backend Architecture Specialist

Key Contributions:

- Implemented secure authentication using JWT for session management and BcryptJS for password hashing.
- Designed and developed Role-Based Access Control (RBAC) middleware to protect administrative endpoints.
- Built robust server-side validation to sanitize incoming data and maintain MongoDB data integrity.
- Developed RESTful APIs using Node.js & Express and integrated them with a dynamic React frontend.
- Managed global authentication state using React Context API for protected routes and secure user experience.

Tech Stack: MERN (MongoDB, Express.js, React, Node.js)

2) Tradez – Decentralized Voting DApp, (Final Year Project | 2026)

- Developed a secure, decentralized e-voting application leveraging Ethereum smart contracts.
- Implemented wallet-based authentication to secure the voting process and prevent unauthorized access.
- Utilized IPFS for distributed file storage, ensuring data immutability and high availability.
- Engineered and refactored Solidity smart contracts to manage secure voting transactions and ensure vote integrity.
- Built a responsive and intuitive user interface using Next.js for a seamless user experience.

Tech Stack: Ethereum, Solidity, Next.js, IPFS, Hardhat, MetaMask

3) Furniture Studio - 3D Furniture Customization Tool, 2026

- Developed an interactive web-based application for interior design visualization and custom furniture planning.
- Implemented advanced 3D rendering capabilities leveraging React Three Fiber to display high-quality furniture models in real-time.
- Integrated precise object manipulation using PivotControls, enabling users to interactively scale, rotate, and position items within the virtual space.
- Engineered a dynamic and intuitive user interface that supports seamless switching between 2D and 3D view modes for an enhanced design experience.

Tech Stack: React, React Three Fiber, JavaScript, Tailwind CSS

4) Velvet Co- E-Commerce Platform, Self-Initiated Project | 2026

- Developed a full-stack e-commerce platform using the MERN Stack with responsive customer and administrative interfaces.
- Implemented secure authentication and role-based access control (User and Admin) using JWT and protected API routes.
- Built product, category, order and dashboard management modules with RESTful APIs and MongoDB.
- Integrated Supabase Storage for image management and applied security best practices, including CSRF protection, refresh token rotation, and secure file uploads.

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS, Supabase, JWT, REST API, Vercel

5) Camply - Location-Based Camping & Hiking App, University of Plymouth | Feb 2025 - May 2025

Developed a mobile application that enables campers and hikers to discover, review, and share campsite experiences with real-time communication features.

- Designed and implemented the UI/UX flows for the application
- Integrated real-time data updates using Firebase.
- Supported authentication and dynamic content handling.

Tech Stack: Flutter, Firebase

ORGANISATIONS

Students' Wellbeing Association of NSBM, Vice President of Content Department- "Connect'25"

International Centre for Cultural Exchange of NSBM, Member- Project Team

FOSS Community - NSBM, Member

CERTIFICATES

Industry Preparation Training Programme (IPTP) 2025 — Faculty of Computing at NSBM Green University

Vice President of Content - Connect'25 Certificate of Appreciation — Students' Wellbeing Association of NSBM Green University

Introduction to CyberSecurity — Cisco Networking Academy
